Our Vision

TESLA Teaching School Alliance is a partnership of educators who have the highest expectations and are striving to achieve exceptional education for all by removing barriers to learning, challenging pedagogy and raising aspirations.

To do this we are focused on developing young people, teachers and leaders who innovate and collaborate, who are excited by the opportunities a self-improving system brings and who want far more for our students than just outstanding results.

We are an alliance drawing on the unique characteristics of our individual schools to create a cohesive learning community from 0 - 19 that inspires memorable learning for all.
